

TIGER FLIGHT SUMMER CAMPS

Rome's Tiger Flight Foundation -- in coordination with Freedom Flight Center, Training Rx and Etowah Georgia Youth Science and Technology Center -- offers several summer camps for area youth. They include:

Youth Self-Leadership, ages 13-18, June 7-11 and July 26-30. This 5-day Youth Leadership course is designed for 13-18 year old students. The course guides young people to turn their potential into performance through positive behavior changes that create the foundation for self-leadership. Students will learn goal setting and time management skills and how to turn solutions into actions. They will learn to lead others, make decisions, and problem solve in order to meet their short and long term goals. Students will learn to build the habits that will lead to success now and in the future. Cost is \$400.

Astronomy, ages 10-14, June 14-18. This 5-day course will dig into the basics of astronomy. Students will experience the universe through the use of a state of the art digital projector in a 360 degree dome planetarium. Students will visit each of our planets, several moons including ours, our sun, several constellations, and many deep space objects, i.e. nebula, star clusters, galaxies, etc. Students will use math and science to explore time and distances associated with space travel. Refracting and reflecting telescopes will be discussed. Cost is \$250.

Sciences of Flight, ages 12-14, July 12-15. This 4-day flying course teaches the basics of flying using hands-on activities. Students will experience basic flight maneuvers in Ercoupe including straight and level, climbing, and descending flight as well as take-off and landing procedures. Students will investigate weather and the atmosphere, forces and motion, and human physiology associated with flight. Hands-on activities include measurement of thrust and lift and aircraft flight controls events. Students will visit local aircraft and airport facilities. Cost is \$300.

Experiencing Flight, ages 15 and up, July 19-22. This 4-day flying course teaches the basics of flying using hands-on activities. Students will be taught basic flight maneuvers in Ercoupe and C-172 including straight and level, climbing, and descending flight as well as take-off and landing procedures. Students will record an hour of certified flight training. Students will investigate weather and the atmosphere associated with man in flight. Hands-on activities include measurement of thrust and lift and aircraft flight controls events. Students will visit local aircraft and airport facilities. Cost is \$400.

Private Pilot Solo Course, ages 15 and up, July 26-30. This 5-day flying course teaches the basics of flying using hands-on activities in flight. Students will experience basic flight maneuvers in Cessna aircraft including straight and level, climbing, and descending flight as well as take-off and landing procedures. Students will record five hours of certified flight training and receive 10 additional hours observing flight procedures. Each day the crew of four (instructor and three students) will depart Richard Russell Airport and fly to other airports within 150 miles of Rome. Students will also tour other aircraft and visit airport facilities. Cost is \$1,175.
